

SmartVision and SmartVision LITE

Release note – software version n°1812.3506

Software Update Process

SmartVision regularly checks the availability of updates on your device and you will be notified automatically on home screen with a red label on the “Settings” icon. .

However, you can manually check the availability an update from "Settings"  menu, then select “About phone”, and finally select “System update”

To start the update process:

- select « Settings » item from home screen, 
- then select “Download” item
- Download will start automatically and will last for about 30 to 40 minutes depending of your network bandwidth. Subsequently, the device will reboot automatically until “Home screen” is displayed and announced.

Note:

- Please do not use SmartVision when the download is in progress.
- You must have a data connection, Wi-Fi or 3G enabled to download the software update. Because of important size of this update (about 1GB), we recommend to use the Wi-Fi connection for downloading.
- If the device goes to sleep mode during the download process, just make a short press on ON/OFF button to wake-up the device, then when the download is complete, the upgrade process will start automatically.

System improvements:

- **Overview:**
 - Bug fixes and performances improvements.
 - Translation fixed and improved for Italian, Spanish, German and Dutch languages.
- **User Interface:**
 - Software update improvements. The minimum size memory required to perform an update has been reduced.
 - Command mode: Long press « # » following by « Volume up » or « Volume down » will now manage correctly ringtone sound level of the phone.

Application Improvements:

- **Email:**
 - Fixed a problem with the « echo on input » parameter which stop accessibility when replying or forwarding an email.
- **Kapten (GPS):**
 - Keywords into the menu are now correctly vocalized during navigation.
 - One shot entry: The order to dictate an address has been modified for England and Germany.
- **Messaging (SMS/MMS):**
 - Correcting problems with the reading of SMS and MMS with emoticons. Emoticons are now filtered and no longer prevented reading messages.
