SmartVision2

Release note – software version n° SV2.01.00.3746.USER

Software Update Process

An Internet connection is required to download and install SmartVision2 updates.
To update your device, go to "Settings", select "About Phone" and then "System Updates".
Select "Download and install" at the bottom of the list and press the "OK" button to start the download.

Downloading the update may take some time depending on your connection. You can view its progress via the update notification in the notification pane. When the download is complete, select "Install" from the system update screen. It may take a few minutes to complete the process before you can use the product (vocalization feedback).
