SmartVision2
Release note – software version n° SV2-8475

Software Update Process

An Internet connection is required to download and install SmartVision2 updates.
To update your device, go to "Settings", select "About Phone" and then "System Updates".
Select "Download and install" at the bottom of the list and press the "OK" button to start the download.

Depending on your connection, downloading the update may take some time. You can view its progress via the update notification in the notification shade. When the download is complete, select "Install" from the system update screen. It may take a few minutes to complete the process before you could use the product (vocalized feedback).

System improvements:

- **Overview:**
  - o Bugs fix and performance improvement
  - o Translation and vocalization improvement
- **System:**
  - o New system shortcut added to launch QuickSupport application, Launch the "Phone" application with the pick-up key then dial the following code: *#000#
- **Accessibility:**
  - o "Switch access" option removed from Accessibility settings.

Application Improvements:

- **Calendar**

  Changing the display:
  - o The recorded events are now displayed over a rolling year. Any event created with a date greater or less than one year (compared to the current date) will be saved but will not be displayed in the event list.
  - o By default, the next upcoming event is displayed first in the list.
  - o Events created with a recurrence are now duplicated for each recurrence.
  - o Deleting an event with a recurrence will delete all duplicate events.
  - o Suppression of the recurrence "Every hour".
  - o Fixed bugs that sometimes prevented changing the date or time of an event.
- **Banknote recognizer**
  - o Improvement of bank note recognition.
  - o Banknote recognizer is now able to identify Swiss currency.
- **Book Reader**
  - o Improvement of some audio books opening (Epub format and files in Doc, Docx and TXT format).

- o Fixed a bug that prevented the Book reader application from opening attachments in emails.
- o The option to pause the reading of a file when exiting the application works again.
- o It is now possible to do a long press on OK key in the menus of "Explore the file tree" function to open the contextual menu allowing access to the following options: More information, Favorites, Delete the file.
- o Bookmarks are now well saved when using the "Explore the file tree" function.
- o Resume playback is now working when you use the "Explore file tree" function

- **.Kapten**
  - o Ktags created are now sorted by alphabetical order to find them more easily.

- **Message**
  - o The displaying of contacts now respects the order of the phone numbers in the contact details.
