SmartVision3
Release note – software version n° 11090

Software Update Process

You must have an internet connection to download and install SmartVision3 system updates. To update your device, select "About phone" from the list of settings then "System updates". Select "Download" at the end of the list and press the OK key to start the download. Attention, your SmartVision3 must have at least 30% battery to download and install the update. Downloading the update may take time depending on your connection; SmartVision3 regularly announces the progress of the download. When the download is complete, select "Install" from the System Update screen and press the OK key to start the installation. SmartVision3 regularly informs you of the progress of the installation. Once the installation is complete, SmartVision3 restarts to finalize the update installation.

System improvements:

- **Overview:**
  - o Bugs fix and performance improvement.
  - o Translation and vocalization improvement.

- **System:**
  - o Google security patch update (May 2023)
  - o Home screen:
    - It is now possible to add links to internet website on the home screen.
    - The contextual menu of applications is now also available from the home screen. A long press on the "OK" key now allows you to access additional options specific to the selected application.

      Example: A long press on the OK key when the Contacts application is selected allows you to access the "Add a contact" option.

      A long press on the OK key when the Messages application is selected allows you to access the "New conversation" option. etc.
  - o SmartVision3 in Finnish now use "Google Now" and no longer "Google Assistant" via the voice control button.

- **Accessibility:**
  - o Keypad shortcuts:
    - The feature "Enable/Disable Wi-Fi Hotspot" is now available in the list of actions associated with a keyboard shortcut.
    - The feature "Enable/Disable do not disturb mode" is now available in the list of actions associated with a keyboard shortcut.
    - Fixed a bug that prevented you from turning off the Wi-Fi with a keyboard shortcut when the phone was in airplane mode.

Application Improvements:

- **Book reader:**
  - o The "Audiobooks" folder can now be used to store your files (in addition to the "Books" and "Downloads" folders).

- o It is now possible to access your SD card from the "Explore file tree" option.
- o Opening a file now systematically launches the automatic playback.

- **Gmail:**
  - o Fixed a bug that prevented adding a second account using the KAPSYS virtual keyboard.

- **Kapten:**
  - o The downloading progress when you install a map is now directly announced by the application (in percentage).

- **NFC:**
  - o Fixed a bug that prevented "Airplane Mode" from being saved on an NFC tag.

- **Phone:**
  - o When receiving a call, quick responses are now available with direct access to the Pound (#) key.
  - o Simplified display of the contact list in the phone application. Contacts are no longer announced twice.
  - o For more privacy, it is now possible to hide the number and name of the caller during an incoming call. To do this, deselect the "Caller ID" option in the phone app settings.

- **Sound recorder:**
  - o It is now possible to delete a voice memo with the delete key.

- **WhatsApp:**
  - o The WhatsApp application is now installed by default on SmartVision3. It will be available directly on the home screen for new products.
  - o It is now possible to take a WhatsApp call with the OK key and hang up the call with the Delete key.

- **Web radio:**
  - o Fixed a bug that prevented the playback of certain web radios.
